

FOCUR

Pedestal and swing frame grinding wheels

FOCUR

Impressive performance, unbeatable price.

The new FOCUR impresses with proven performance – now even more affordable.

Tyrolit grinding wheels combine effort-saving work with high performance. Significantly shorter grinding times, improved stock removal rates and longer tool life – thanks to its premium zirconium aluminium oxide grain, FOCUR noticeably optimises your machining processes. The tool unfolds its full potential especially when swing frame grinding heavy and bulky castings.

+ Maximum efficiency, minimum effort: High aggressiveness for effort-saving, productive work.

+ Versatile use: From fine deburring to grinding of hard materials.

+ Safety during manual grinding: Certified quality for maximum safety.

+ Individual consulting: Tailored solutions for your application.

FOCUR for pedestal and swing frame grinding

Manual processing of cast materials

	Shape	TN	Dimensions (mm)	Specification	PU
	1	34758552	400 × 50 × 127	A14-BA 50	1
		34758666	500 × 50 × 127	A14-BA 50	1
