

Twice as strong.

Double flaps for double power. With its double-layer design, our TWIN FLAP disc provides twice the strength. When the job needs full power, choose a TWIN FLAP.

TWIN FLAP
for steel and stainless steel

TWIN FLAP

for steel and stainless steel

+ Aggressive

+ Reduced thermal load

+ Double flap arrangement for maximum lifetime

+ Ceramic grain for our highest stock removal rate

Double grinding is better.

Reliable TYROLIT technology, now even better – our new TWIN FLAP flap disc. Due to the combination of double discs with a ceramic grain, it grinds with double the power, and yet generates significantly less friction. The result: a cooler, more precise and faster finish that doesn't affect the paint of the work piece. Curious?

Try out the new TWIN FLAP now!
