

Flexible Abrasives - SCM discs

★★★
PREMIUM

PREMIUM SCM XC discs
with removable centre hole
for universal use

Application

- + For removing rust, paint, lacquer and for repairing lightly damaged surfaces
- + For finishing, matting and blending with very little roughness
- + Best suitable for stainless steel and nonferrous metals

We recommend

- + Use on adjustable angle grinders
- + "COARSE" grain for cleaning, derusting, removing of layers and for "Final Finish"
- + "MEDIUM" grain for light cleaning, deburring and "Final Finish"
- + "VERY FINE" grain as last step

Advantage

- + Extremely long lifetime
- + Open structure prevents clogging and heat built-up
- + Very low vibrations thanks to the integrated centering hole
- + Free of corrosive elements
