Cut-off wheels

for cast iron

+ Highest aggressiveness with the best service lifetime thanks to innovative production technology

+ Maximum comfort when machining the hardest workpieces

+ New bond system combined with high-quality zircon corundum enables shortest cut-off times

+ Best lifetime for economical work

Application:

+ For machining cast materials

We recommend:

- + Degree of hardness R (hard): Longer lifetime
- + Degree of hardness P (medium): all-round solution - high cutting ability and economical lifetime
- + Degree of hardness N (soft): highest cutting ability and aggressiveness
- + Type number 5496: Particularly suitable for sanded cast materials

CERABOND X Cut-off wheels

for cast iron

+ Excellent lifetime and stability

+ Cleanest surfaces without any discolouration, reduces rework and working times

+ Shortest cutting times and comfortable working with low effort

+ Highest aggressiveness over the entire lifetime

Application:

- + For machining various cast materials, such as lamellar graphite cast iron and spheroidal cast iron
- + For cutting very hard, demanding workpieces and large cross-sections

We recommend:

- + Best results when used on powerful angle grinders

Rough grinding wheels

for cast iron

+ Highest stock removal rate thanks to high-quality zirconium aluminium oxide

+ Edge chipping is reduced to a minimum

+ Bond specially adapted to cast iron

Application:

+ For the most demanding applications on cast iron with lamellar graphite (GJL) and spheroidal cast iron (GJS), for surface grinding as well as for deburring and smoothing work

- + HARD (S): the deburring specialist offering the longest lifetimes
- + MEDIUM (R): the universal type with increased working comfort
- + SOFT (P): exceptional comfort and maximum aggressiveness

We recommend:

+ Optimised for high-frequency and compressed air-driven turbine angle grinders

+ 4 mm thickness for peripheral grinding (only HARD and MEDIUM) / 7 mm thickness for rough grinding

VIBSTAR SOFT rough grinding wheels

for cast iron

+ VIBSTAR vibration damping developed and patented by TYROLIT enables particularly gentle grinding

+ Multi-layer composition and the permanently attached plastic flange reduce vibrations by up to 50%

+ VIBSTAR technology helps to prevent occupational issues such as muscular and skeletal damage, neurological illnesses and circulatory problems

Application:

+ For demanding applications on cast iron and all cast materials, for surface grinding as well as for deburring and smoothing work

CERABOND X rough grinding wheels

for cast iron

+ Fastest grinding due to the structure of the ceramic grain used

+ Consistent aggressiveness thanks to combination of new bond system with ceramic grain

+ Extensive lifetime and best results without edge chipping

+ Developed for high pressure in the most difficult conditions

Application:

+ For the most demanding applications on cast iron with lamellar graphite (GJL) and spheroidal cast iron (GJS), for surface grinding as well as for deburring and smoothing work

We recommend:

+ Optimised for high-frequency and compressed air-driven turbine angle grinders

SIC rough grinding wheels for cast iron

Application

+ For the removal of cast skin and sandings on cast iron workpieces

Avantage

- + Specially developed for the removal of cast skin and sandings
- + Low grinding pressure needed
- + High aggressiveness
